

User Documentation

You can find the current User-Documentation in our github wiki here:

<https://github.com/amosproj/amos2023ss01-apache-pulsar-ui/wiki/User-Documentation>

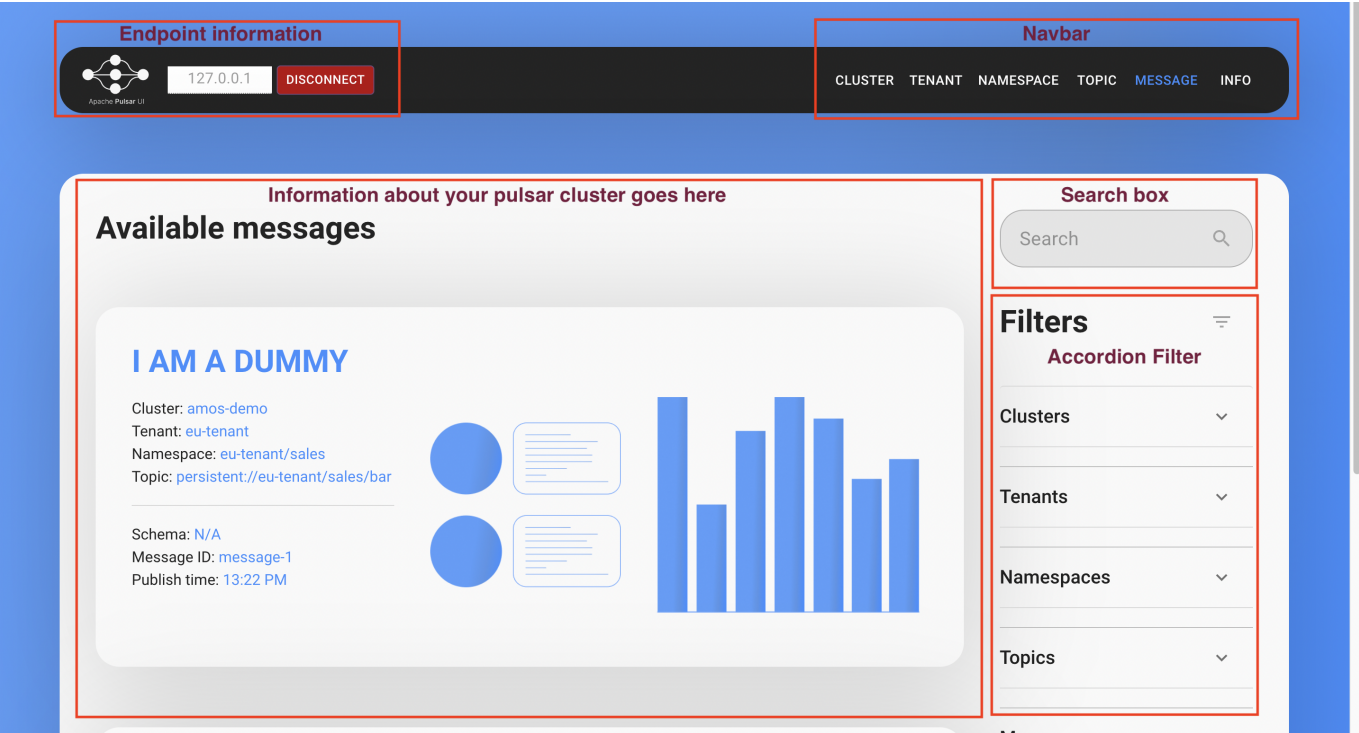

To meet the requirements of the sprint, we also transformed the state of the wiki from 30.05.2023 to this pdf.

Preparations

Configure the application with a config file, and make sure the application is up and running. To start the app, follow the instructions in [Build Documentation](#).

Workflow

With the intuitive UI design, getting insight into your Apache pulsar cluster is very easy.

Navbar

Use the navbar to navigate different clusters, tenants, namespaces, topics, and messages in your Apache Pulsar.

Search box

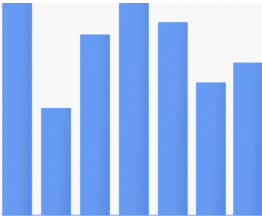

Use the search box to search for corresponding information. Our app also provides a search box in each hierarchy of Apache Pulsar.

Cluster: [amos-demo](#)

Tenant: [eu-tenant](#)

Namespace: [eu-tenant/sales](#)

Topic: [persistent://eu-tenant/sales/bar](#)

Schema: [N/A](#)

Message ID: [message-1](#)

Publish time: [13:22 PM](#)

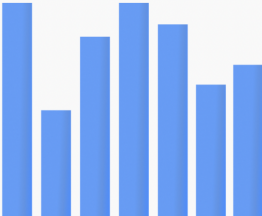

MESSAGE THAT HAS ANOTHER TEXT

Cluster: [amos-demo-2](#)

Tenant: [eu-tenant](#)

Namespace: [eu-tenant/sales](#)

Topic: [persistent://eu-tenant/sales/foobar](#)

Schema: [N/A](#)

Message ID: [message-2](#)

Publish time: [10:05 AM](#)
